

The following information is being shared in an effort to increase awareness and to ensure City residents are well informed of the City of Wray Recycling Services. In order to provide a high level of service to customers and reduce landfill materials, free grass clipping disposal areas and recycling bins are available.

- Grass Clippings
 - Clippings may be hauled to the City grass clipping disposal areas, which are west of the City shop at 150 Ash Street. No containers should be left at the grass disposal area.
- Recycle Bins
 - Recycling Bins are located across from the City Shop at 150 Ash Street. Magazines, newspaper, and cardboard are the only acceptable material at this time. Containers have been placed around the city by the WRAC for aluminum cans.
- Information Regarding Plastic Recycling Pilot Program
 - Plastic #1 & #2 recycling has just recently been made available as a pilot program to evaluate its potential. Plastic Recycling Bins are located across from the City Shop at 150 Ash Street.
 - To determine number, locate the chasing arrows on the container and reference the number inside the chasing arrows. The numbers refer to different types of plastics used in making plastic products and containers.
 - Plastic numbering scheme:
 - #1: **PET or PETE** (polyethylene terephthalate): Used in the production of soft drink and water bottles. PET can be recycled into fiberfill for sleeping bags, carpet fibers, rope, pillows, bags and packaging.
 - #2: **HDPE** (high-density polyethylene): Used in milk jugs, butter tubs, detergent and shampoo bottles. HDPE can be recycled into flower pots, trash cans, and traffic barrier cones.
